

VICE PRESIDENT, COMPLIANCE/INTERNAL AUDIT / PRIVACY

Hospital Experience Is Required | \$220,000 - \$250,000 Per Year

Do you have a collaborative leadership style?

Bring your agile and effective communication approach to our diverse community hospital. We want a leader with solid business acumen to oversee the daily operations of our hospital's comprehensive corporate compliance and internal audit functions.

You should be a highly detailed and organized professional with analytical prowess to provide executive leadership and vision for the strategic planning and implementation of an integrated healthcare internal audit and corporate compliance system. You will have the responsibility, authority, and resources to ensure the hospital complies with all laws, regulatory requirements, data privacy statutes, policies, and procedures. **Primarily, you will:**

- Establish standards and implement procedures to ensure that the compliance programs hospital-wide are effective and efficient to identify and prevent, detect, and correct noncompliance with governance regulations
- Develop/review audit plans to ensure the reliability and integrity of financial information and reporting and guiding senior management regarding related business issues and concerns
- Audit departments for compliance with rules and investigations while building relationships with regulatory agencies to determine Hospital's compliance status
- Conduct risk assessments and provide reports to BODs and senior management of the operation and progress of compliance efforts

To have success as VP of Compliance/Internal Audit, you must have:

- Bachelor's degree in Law, Finance, Business Management, or a related field required; Master's or Law degree is highly preferred
- Minimum of 5 years of proven experience in a compliance officer role in the healthcare industry required
- Minimum of 5 years of progressive auditing experience (conducting/overseeing) in the healthcare industry highly preferred
- Minimum of 3 years of experience serving as Privacy professional in healthcare setting
- Extensive knowledge and understanding of federal, state, and local regulatory healthcare requirements
- Thorough knowledge of advanced business management practices and organizational policies/procedures
- A history of working with many regulatory bodies involved in the oversight/auditing/operations of a hospital required
- Certifications in Healthcare Compliance (CHC), Internal Auditing (CIA), Risk Management Assurance (CRMA), Public Accountant (CPA) or Information Systems Auditor (CISA) preferred
- Advanced analytical/risk management skills to comprehend, analyze/interpret complex, multi-dimensional data
